

# The Sea Among Us - part 1

© 2016 Holly Arntzen/Richard Hebda/Kevin Wright/David Sinclair

What is it most important that people understand about the ocean? The lyrics talk about the myriad interconnected moving parts of the ocean—winds, tides, currents, upwellings, animal migrations—as melodies in an symphony that are constantly interacting in four dimensions. The timing and placement of these movements is critical to ocean and all life on Earth, and the function that global seas play in creating weather and climate.

**Open sea...open sea**

**Open sea...open sea**

The sea among us...Precious inland ocean

A sea of melodies...Always in motion

The sea among us...Precious inland ocean

A sea of melodies...Always in motion

**These melodies played in the ocean**

**In four dimensions changing constantly**

**A symphony always in motion**

**Endless inventions in the open sea**

**Open sea...open sea**

The sea among us...Currents and migrations

Upwellings, winds and tides...In circulation

The sea among us...Currents and migrations

Upwellings, winds and tides...In circulation

**These melodies played in the ocean**

**In four dimensions changing constantly**

**A symphony always in motion**

**Endless inventions in the open sea**

**Open sea...open sea**

**Open sea...open sea**
